DETAILED ACTION

It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.
6. Confirmation number (See MPEP § 503).

Claim Rejections - 35 USC § 112

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4, as claimed is unclear. It seems to claim that the "**second error checking means** is providing a viterbi decoding to the second signal". It should be the **viterbi decoder means** providing viterbi decoding to the second signal. (See specification page 9, lines 5-16.

Allowable Subject Matter

Claims 1-3,5-8 are allowed.

Claim 4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: non of the prior art of record anticipate or render obvious the claimed CDMA receiver apparatus comprising: despreading means for providing despread processing to

a plurality of the received signals multiplexed to separate said signals; first viterbi decoding means for providing decoding to a first signal having a minimum frame length of the spread signal; a first error checking means for providing an error checking to the first signal subjected to viterbi decoding; weighting factor calculating means for setting a weighting factor based on whether or not an error is detected; and one or plurality of second viterbi decoding means for providing viterbi decoding to a second signal other than the first signal using a value obtained by multiplying a path metric by the weighting factor as claimed in claims 1,6,7, and 8.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dent (5,577,053) and Ling (6,414,988) are cited to as related to the claimed subject matter.
